949-375-1978 | [denniswang812@gmail.com](mailto:denniswang812@gmail.com) | [LinkedIn](#) | [GitHub](#)

## EDUCATION

---

### Northeastern University London

*Bachelor of Science in Computer Science + Business Administration*

London, UK

*Sept. 2023 – April 2024*

## EXPERIENCE

---

### Full-Stack Developer

Oct. 2020 – July 2023

*Major League Hacking*

*Irvine, CA*

- Led and managed cross-functional teams of up to 4 members in over 8 hackathons over 2 years
- Provided guidance and motivation to team members, encouraging creativity and problem-solving
- Developed full-stack applications using JavaScript libraries, such as React and NextJs, harnessing modern web technologies to create intuitive and user-friendly interfaces

### Engineer & Research Fellow

July 2022

*University of California, Irvine*

*Irvine, CA*

- Contributed to research in assistive technology, specifically focused on designing and developing a hands-free mouse for individuals with disabilities.
- Awarded the Certificate of Research & Innovation Leadership for completing the BEAM program requirements, demonstrating outstanding research, innovation, and entrepreneurship skills.
- Leveraged programming knowledge to program an Arduino for the mouse headset
- Used the Fusion 360 software to design a user-friendly and ergonomic device

### Programmer & Builder

June 2021 – May 2022

*VEX Robotics*

*Irvine, CA*

- Played a pivotal role as a programmer and builder for VEX team 2496R, contributing to our performance at the VEX Worlds competition.
- Optimized an essential robot turn function to under 20 lines in an established codebase via Git
- Volunteered at school district hosted events, leveraging robotics expertise to engage and inspire the community while giving back through knowledge sharing and mentorship

## PROJECTS

---

### EquilibriNews | *Nextjs, JavaScript, React, Puppeteer*

Feb. 2022 – March 2023

- Developed a website to scrape news from major publishers and displayed in a way that reduced political bias
- Implemented Google's Puppeteer API to scrape data from news websites
- Consulted UPenn Master's Graduate Melissa Amaya through the Polygence platform for technical advice

### CultureCanvas | *NextJs, TyoeScript, React, MaterialUI, ArticAPI*

July 2023

- Designed and developed a virtual art gallery for a 36 hour hackathon, HackBytes II
- Managed a team of 3 developers and 1 UI designer via Discord to complete the project within the short timeframe
- Accessed the Art Institute of Chicago API to access artworks
- Deployed the website using Vercel to achieve streamlined deployment and automated integration

### SigmaChat | *HTML, CSS, JavaScript, Firebase*

July 2023

- Developed SigmaChat, a web chatroom leveraging Google OAuth for seamless user authentication
- Implemented Firebase Realtime Database to store and retrieve user-generated data, ensuring real-time updates and data synchronization.
- Hosted SigmaChat on Vercel for efficient deployment, continuous integration, and easy scalability

## TECHNICAL SKILLS

---

**Languages:** Java, Python, JavaScript, SQL, HTML/CSS, TypeScript

**Frameworks:** React, Node.js, NextJs, ChakraUI, Firebase, Material-UI

**Developer Tools:** Git, VS Code, Visual Studio, IntelliJ, Eclipse, Vercel, Netlify

**Libraries:** pandas, NumPy, MATLAB, Puppeteer
