Languages & Frameworks: Java, Python, TypeScript, Rest APIs, React.js, Next.js, Express, Node.js, Flask, Twilio, Prisma, TypeORM, Go Developer Tools: Git, Postman, npm, Amazon Web Services, Linux, Vercel, Supabase, MongoDB, Docker, VSCode Interests: tennis, coaching, developer tools, real estate, finance, college consulting, traveling, running, skiing, cooking

## **Experiences**

Irvine, CA (Remote) **Atoma Media** Jan. 2025 – Present

Software Developer Intern

- Developed chat threading and storage system using PrismaORM and Nextjs serverless functions.
- Followed React design principles to develop intuitive frontend elements and layout for the chat, optimizing rendering time by 80%.
- Performed weekly feature demonstrations to executives, incorporating feedback and increasing active users by 171% in January.

Boston, MA Sandbox

Head of Developer Experience / Developer

Sep. 2024 - Present

- Reduced project onboarding time by average of 40% across 6 projects through interactive curriculum for React, GitHub, and Postman.
- Supported junior developers on project teams with pair programming sessions.
- Encouraging effective communication in project team in weekly standups and code reviews.

## **Digital Archive of Indigenous Language Persistance (DAILP)**

Software Engineer / Research Assistant

Boston, MA Sep. 2024 - May 2025

- Developing web portal for linguists to translate Cherokee documents with audio and text support.
- Integrated word part and English translation editing with Rust endpoints and React components.
- Refactored authentication system, replacing outdated auth library with AWS Amplify.

## **Projects**

#### **GraduateNU** (Github) | React, Nextjs, TypeORM, nearly

Sep. 2024 - Present

- Contributed to student-built degree audit platform serving 1,000 monthly users, delivering requirement validation 10x faster than previous system
- Independently developed plan of study scraper and API to streamline user experience for 400+ majors

## Green Infrastructure Boston (Github) | AWS, Nestjs, React

Jan. 2025 - Apr. 2025

- Built automated user account creation through DynamoDB integration & volunteer registration API
- Implemented designer Hi-Fi Figma designs for volunteer sign-up page as functional React elements.
- Completed two critical tickets outside assigned scope, ensuring project continuity during team member absence.

#### **T-Error** (Devpost) | C++, MongoDB, Express

Oct. 2024

- Built HackHarvard 2024 Best Developer Tool C++ shell wrapper to classify 100+ terminal errors, targeting debugging pain points in team settings.
- Drove project vision as team lead deployed error classification dashboard in Nextjs and managed task division to limit merge conflicts to 5 instances across 99 commits.

## EquilibriNews (Github) | Playwright, Puppeteer

Apr. 2022 – Jan. 2024

- Launched Nextjs news platform scraping content from 8 major publishers, reducing political bias exposure through balanced presentation.
- Engineered Playwright/Puppeteer web scrapers that achieved 30% faster data retrieval than before, directly optimizing content pipeline efficiency for real-time updates.
